Input material

Metro 4 provides simple classes and structures to create input fields in Material Design Style.

About

Designed for using with [PhoneGap](#). Component used special **-webkit** css rules.

In Metro 4, you can use enhancement version of input control to create input in Material Design Style. To define it, add attribute `data-role="materialinput"` to HTML input element. You can assign role `input` to any text inputs: `text` , `password` , `email` , etc.

Metro 4

Enter your email

```
<input type="text" data-role="materialinput"
placeholder="Enter your email">
```

Input with label

Metro 4

Enter your email

```
<input type="text" data-role="materialinput"
data-label="User email"
placeholder="Enter your email">
```

Input with label and informer

Metro 4

Enter your email

```
<input type="text" data-role="materialinput"
data-label="User email"
data-informer="Enter a valid email address"
placeholder="Enter your email">
```

Input with label, informer and icon

Metro 4

Enter your email

```
<input type="text"
data-role="materialinput"
data-icon="<span class='mif-envelop'>"
data-label="User email"
data-informer="Enter a valid email address"
placeholder="Enter your email">
```

Customize

You can change visual style with special classes attributes: `data-cls-component` , `data-cls-input` , `data-cls-label` , `data-cls-informer` , `data-cls-icon` , `data-cls-line` .

Metro 4

Enter your email
