# Figures

Documentation and examples for displaying related images and text with the figure component in Metro 4.

Anytime you need to display a piece of content—like an image with an optional caption, consider using a `<figure>` .

Use the included `.figure` , `.image` and `.caption` classes to provide some baseline styles for the HTML5 `<figure>` and `<figcaption>` elements. Images in figures are fluid and are made responsive with `max-width: 100%` and `height: auto` .

A caption

```
<figure>
  
  <figcaption>A caption for the above image</figcaption>
</figure>
```

Aligning the figure's caption is easy with our [text alignment classes](#).

A caption

A caption

A caption

```
<figure>
  
  <figcaption class="text-right">A caption for the above image</figcaption>
</figure>
```
