Animation intro

Use builtin animations for your object and elements to create different animation effects.

About Animation

Metro 4 contains classes and routines to create different animation effects. All classes stored in `metro-animation.css` or built in `metro-all.css` .
To use animation classes, you must include file `metro-animation.css` in head of your page or use `metro-all.css` .

```
<!DOCTYPE html>
<head>
  ...
  <link href="path_to_metro/metro.css" rel="stylesheet">
  <link href="path_to_metro/metro-animation.css" rel="stylesheet">
  ...
</head>
```

or

```
<!DOCTYPE html>
<head>
  ...
  <link href="path_to_metro/metro-all.css" rel="stylesheet">
  ...
</head>
```
