Badge

Use badge component to create a counter marker or small label.

About

Added in 4.2.5

Sometimes it is necessary somehow to note the number of certain elements on the button or another element. In Metro 4 for this purpose, there is a special component `badge` . To create `badge` you must add `` with class `.badge` to the element.

My Cart⁴

```
<button class="button">
  <span class="ml-1">My Cart</span>
  <span class="badge">4</span>
</button>
```

Badges scale to match the size of the immediate parent element by using relative font sizing and em units.

My Cart⁴

My Cart⁴

My Cart⁴

Badges can be used as part of links, buttons or others element to provide a counter or a small label.

My Cart⁴ My Cart⁴ My cart⁴

```
<button class="button">
  <span class="ml-1">My Cart</span>
  <span class="badge">4</span>
</button>
<a href="#" class="pr-2">
  <span class="ml-1">My Cart</span>
  <span class="badge">4</span>
</a>
<h5 class="d-inline pos-relative ml-4 pr-4">
  My cart
  <span class="badge">4</span>
</h5>
```

Important! Parent element must have must have a `position` property other than `static` .

Badge position

Badge can have three positions inside the parent element: `default` , `inside` , `inline` . Inside and inline positions are specified by the corresponding classes `.inside` , `.inline` .

default

inside

inline

My Cart⁴

My Cart⁴

My Cart⁴

```
<button class="button m-1">
  <span class="mif-cart"></span>
  <span class="ml-1">My Cart</span>
  <span class="badge bg-green fg-white">4</span>
</button>

<button class="button m-1">
  <span class="mif-cart"></span>
  <span class="ml-1 mr-2">My Cart</span>
  <span class="badge inside bg-pink fg-white">4</span>
</button>

<button class="button m-1">
  <span class="ml-1">My Cart</span>
  <span class="badge inline bg-red fg-white">4</span>
</button>
```

For the next element default position is a **inside**: `.brand` , `.app-bar-item` , `.app-bar-menu > li > a` , `.h-menu > li > a` , `.d-menu > li > a` , `.v-menu > li > a` , `.t-menu > li > a` .

Badge styling

You can change default color style of `badge` with Metro 4 color classes.

My Cart⁴ My Cart⁴ My Cart⁴

```
<button class="button m-1">
  <span class="mif-cart"></span>
  <span class="ml-1">My Cart</span>
  <span class="badge bg-red fg-white">4</span>
```
