Material Tabs

Metro 4 has at its disposal classes and a plugin for creating an tabbed interface in material design style.

About

Designed for using with [PhoneGap](#)

Material tab component designed for using with [PhoneGap](#) framework and based on Google Material design guide.

Since specific style rules for Chrome are used, the use in other browsers is not recommended.

To create material tabs, add attribute `data-role="materialtabs"` to your list element. Each item must be defined as `tab_caption` . For link `tab` to content container, use `anchor` attribute `href` .

Metro 4

GAMESAPPLICATIONSMUSIC

Music

```
<ul class="app-bar-present pos-absolute" data-role="materialtabs">
  <li><a href="#games">Games</a></li>
  <li><a href="#applications">Applications</a></li>
  <li class="active"><a href="#music">Music</a></li>
  <li><a href="#films">Films</a></li>
  <li><a href="#press">Press</a></li>
  <li><a href="#books">Books</a></li>
</ul>
<div style="margin-top: 112px">
  <div id="games">Games</div>
  <div id="applications">Applications</div>
  <div id="music">Music</div>
  <div id="films">Films</div>
  <div id="press">Press</div>
  <div id="books">Books</div>
</div>
```

Fixed tabs

You can use attribute `data-fixed-tabs="true"` to set fixed tabs layout. In this layout, all tabs have equal width, and tabs container has no overflow.

Metro 4

MUSICFILMSBOOKS

```
<ul class="app-bar-present pos-absolute"
  data-role="materialtabs" data-fixed-tabs="true">
  <li><a href="#">Music</a></li>
  <li><a href="#">Films</a></li>
  <li><a href="#">Books</a></li>
</ul>
```

Deep option

With attribute `data-deep="true"` , you can put tabs deep on `head-bar` .

Metro 4

MUSICFILMSBOOKS

```
<ul class="app-bar-present pos-absolute"
  data-role="materialtabs" data-fixed-tabs="true" data-deep="true">
  <li><a href="#">Music</a></li>
  <li><a href="#">Films</a></li>
  <li><a href="#">Books</a></li>
</ul>
```

Options

You can use any options to change component behavior.

- Additional

Option	Data-*	Default	Desc
deep	data-deep	false	For using with <code>head-bar</code> . Put tabs deep on head-bar
fixedTabs	data-fixed-tabs	false	If true, tabs have width 100% and no overflow, all tabs have equal width
clsComponent	data-cls-component		Additional classes for tabs
clsTab	data-cls-tab		Additional classes for each tab
clsTabActive	data-cls-tab-active		Additional classes for active tab
clsMarker	data-cls-marker		Additional classes active tab marker

Events

You can define callbacks for events:

Events	Data-*	Desc
<code>onBeforeTabOpen(tab, target, tab_next)</code>	<code>data-on-before-tab-open</code>	This event occurs before the tab is opened if this function return false, tab is not open
<code>onTab(tab, target, tab_next)</code>	<code>data-on-tab</code>	This event occurs when the tab is opened
<code>onTabsCreate(tab, elem)</code>	<code>data-on-tabs-create</code>	This event occurs when the tabs is created

Customize

You can change tabs style with attributes `data-cls-*` .

Metro 4

MUSIC

FILMS

BOOKS

```
<div class="head-bar pos-absolute bg-darkRed fg-white">
  <button class="expand-button light"><span></span></button>
  <span class="app-title">Metro 4</span>
</div>
<ul class="app-bar-present pos-absolute"
  data-role="materialtabs"
  data-fixed-tabs="true"
  data-deep="true"
  data-cls-tab="bg-red fg-white text-light"
  data-cls-tab-active="text-bold fg-yellow"
  data-cls-marker="bg-orange"
>
  <li><a href="#">Music</a></li>
  <li><a href="#">Films</a></li>
  <li><a href="#">Books</a></li>
</ul>
```
