# Lists

Metro 4 provides special classes to create any styled lists.

## About

Metro 4 contains any styled lists: `step-list` , `items-list` , `feed-list` , `custom-marker` .

## Custom marker

You can create list with custom marker. To create it, add class `.custom-list-marker` to your list element and set attribute `data-marker` for list item.

★ Home

🔗 Base

✓ Widgets

♥ Contacts

```
<ul class="custom-list-marker">
  <li data-marker="★">Home</li>
  <li data-marker="🔗">Base</li>
  <li data-marker="✓">Widgets</li>
  <li data-marker="♥">Contacts</li>
</ul>
```

## Step list

To create `step-list` , use class `.step-list` .

1

First step

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

2

Second step

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old.

3

Third step

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text.

```
<ul class="step-list">
  ...
</ul>
```

## Items list

To create `items-list` , use class `.items-list` for your list and special items inside a list item.

List item  
second label

List item

List item

List item

```
<ul class="items-list">
  <li>
    
    <span class="label">List item</span>
    <span class="second-label">second label</span>
    <span class="second-action mif-alarm fg-red"></span>
  </li>
  ...
  <li class="item ">
    
    <span class="label">List item</span>
  </li>
</ul>
```

or

```
<div class="items-list">
  <div class="item">
    
```

### Table of contents

- Lists

- Sorter
- Touch and swipe

Utilities  
Animations  
Additional

```
<span class="label">List item</span>
<span class="second-label">second label</span>
<span class="second-action mif-alarm fg-red"></span>
</div>
...
<div class="item">
  
  <span class="label">List item</span>
</div>
</div>
```

## Feed list

To create `feed-list` , use class `.feed-list` for your list and special items inside a list item.

This is a title

There were some sings of a calm at noon

10 min
