Ripple

Metro 4 provides simple method to create ripple effect when object clicked.

Create ripple effect

To add `ripple` effect for object you must add attribute `data-role="ripple"` .

> **Yes, share and connect**   Use this option for home or work

```html
<button class="command-button" data-role="ripple">
    <span class="mif-share icon"></span>
    <span class="caption">
        Yes, share and connect
        <small>Use this option for home or work</small>
    </span>
</button>
```

Ripple targets

Also you can define `sub elements` for ripple effect. To define sub elements add attribute `data-ripple-target` . An attribute can take `name` , `class` or `id` of selector.

> General
> Home
> Products
> Windows
> Skype
> Shop
> Cart

```html
<ul class="v-menu border bd-light" data-role="ripple" data-ripple-target="li">
    <li class="menu-title">General</li>
    <li><a><span class="mif-home icon"></span> Home</a></li>
    <li class="menu-title">Products</li>
    <li><a><span class="mif-windows icon"></span> Windows</a></li>
    <li><a><span class="mif-skype icon"></span> Skype</a></li>
    <li class="menu-title">Shop</li>
    <li><a><span class="mif-cart icon"></span> Cart</a></li>
</ul>
```

Ripple color

To define ripple color add attribute `data-ripple-color` . An attribute can take a `hex color` value.

> **Yes, share and connect**   Use this option for home or work

```html
<button class="command-button" data-role="ripple" data-ripple-color="#1ba1e2">
    <span class="mif-share icon"></span>
    <span class="caption">
        Yes, share and connect
        <small>Use this option for home or work</small>
    </span>
</button>
```

Ripple alpha channel

To define alpha factor for ripple effect, you can use attribute `data-ripple-alpha` . An attribute can take value from `0` to `1` .

> **Yes, share and connect**   Use this option for home or work
> **Yes, share and connect**   Use this option for home or work

```html
<button class="command-button bg-green"
        data-role="ripple"
        data-ripple-color="#CE352C"
        data-ripple-alpha=".2">
    <span class="mif-share icon"></span>
    <span class="caption">
        Yes, share and connect
        <small>Use this option for home or work</small>
    </span>
</button>
<button class="command-button bg-green"
        data-role="ripple"
        data-ripple-color="#CE352C"
        data-ripple-alpha="1">
    <span class="mif-share icon"></span>
    <span class="caption">
```

```
        Yes, share and connect
        <small>Use this option for home or work</small>
    </span>
</button>
```

        Yes, share and connect
        <small>Use this option for home or work</small>

</button>
