Images

Metro 4 contains special classes for displaying images. All lightweight images styles apply to images through classes and special wrappers.
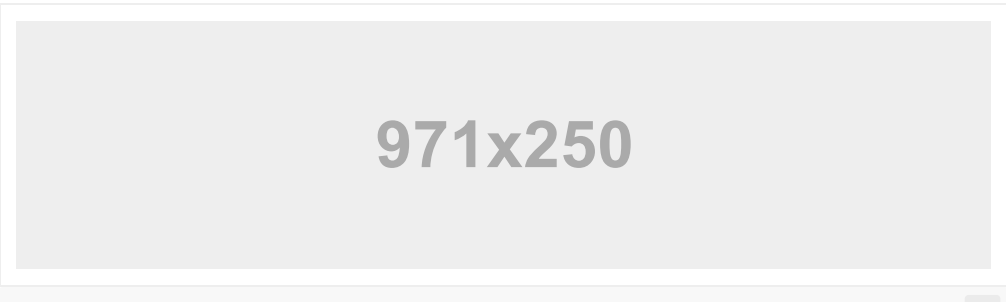

Image container

All styles to image apply if image places in the block with class `.img-container` . This container is fluid and are made responsive with `max-width: 100%` and `height: auto` are applied to the image so that it scales with the parent element.

971x250

```
<div class="img-container">
    <img src="...">
</div>
```

Image container helpers

With image container you can use special subclasses to extend visual style for images.

.rounded
234x100

.drop-shadow
234x100

.thumbnail
224x100

.thumbnail & title
224x100
Pol. To some, a power is a heaven for meetting.

.selected
234x100

.selected
234x100

.selected
224x100

.selected
224x100
Pol. To some, a power is a heaven for meetting.

```
<div class="img-container">
    <img data-src="holder.js/100px100">
</div>

<div class="img-container rounded">
    <img data-src="holder.js/100px100">
</div>

<div class="img-container drop-shadow">
    <img data-src="holder.js/100px100">
</div>

<div class="img-container thumbnail">
    <img data-src="holder.js/100px100">
</div>

<div class="img-container thumbnail">
    <img data-src="holder.js/100px100">
    <span class="title">
        Pol. To some, a power is a heaven for meetting.
    </span>
</div>

<div class="img-container selected">
    <img data-src="holder.js/100px100">
</div>
```

Overlay

With Metro 4 you can create image with overlay and this simple and easy.

971x250

```
<div class="img-container">
    <img data-src="holder.js/100px250">
    <div class="image-overlay">
        <h2 class="text-light">Image title</h2>
        <p>
            Ubi est noster nix? An unveiled form of issue is the awareness.
        </p>
    </div>
</div>
```
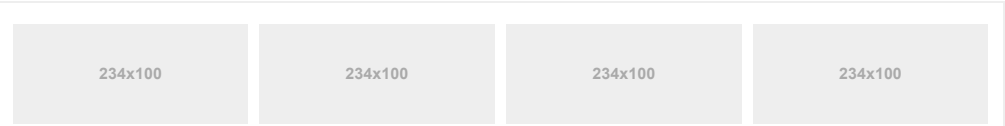

You can change overlay background color with additional color classes `.op-*`. Colors are defined in `metro-colors.css`.

| 234x100 | 234x100 | 234x100 | 234x100 |

```
<div class="img-container">
    <img src="...">
    <div class="image-overlay op-amber"></div>
</div>
```

```
<div class="img-container">
    <img data-src="holder.js/100px250">
    <div class="image-overlay">
        <h2 class="text-light">Image title</h2>
        <p>
            Ubi est noster nix? An unveiled form of issue is the awareness.
        </p>
    </div>
</div>
```

You can change overlay background color with additional color classes `.op-*`. Colors are defined in `metro-colors.css`.
