Sizing

Easily make an element as wide or as tall (relative to its parent) with our width and height utilities.

Width

Width utilities are support for 25%, 50%, 75%, and 100% by default.

Width 25%
Width 50%
Width 75%
Width 100%

```
<div class="w-25">Width 25%</div>
<div class="w-50">Width 50%</div>
<div class="w-75">Width 75%</div>
<div class="w-100">Width 100%</div>
```

Max-width

You can also use `max-with` utilities as needed: `.mw-25` , `.mw-50` , `.mw-75` , `.mw-100` .

Max width 75%

```
<div class="mw-75">Max width 75%</div>
```

Height

height utilities are support for 25%, 50%, 75%, and 100% by default.

Height 25%	Height 50%	Height 75%	Height 100%

```
<div class="h-25">Height 25%</div>
<div class="h-50">Height 50%</div>
<div class="h-75">Height 75%</div>
<div class="h-100">Height 100%</div>
```

Max-height

You can also use `max-height` utilities as needed: `.mh-25` , `.mh-50` , `.mh-75` , `.mh-100` .

Max height 75%

```
<div class="mh-75">Max height 75%</div>
```

Responsive

All sizing utilities classes has media variants with breakpoints suffixes: `-sm` , `-md` , `-lg` , `-xl` , `-xxl` .
